Projects

DigiLoans

- Created during the RBC Next Great Innovator Hackathon
- Developed to improve the loan application process for small businesses
- Includes an online application that eases the process and shows the status of your application
- Enables the bank employees to easily verify the client data and approve the loan online

The Schism

- My first major project and was based off the Android Open Source Project
- Developed to improve the Android experience by redesigning the user interface and add valuable features to improve the user experience

Employment

McDonald's

Crew Member

2015 to 2016

Prepared quality products while maintaining proper food safety practices, portion control and presentation within service goal times.

Developed positive customer relationships through friendly greetings and excellent service.

Greeted customers and ascertained customers' needs.

Achievements
